PROJECT
Performance flooring were appointed by a well known food manufacturer to carry out the screeds, drainage works and resin finishes to their new production lines. The new line area was total of 500sqm and was to be used for the packing of fresh salads.

CHALLENGE
Performance offered a full solution to the floor zones on this project. The main emphasis being on the hygienic performance of the flooring solution and the ability to maintain a seamless floor zone throughout the full building.

The system had to interlink with the wall system to avoid any potential areas for bacteria to harbour.

SOLUTION
The concrete substrate prepared using a combination of captive shotblasting and diamond grinding.

New drainage channels were set and backfilled using Master Emaco Tixo allowing access for other finishes within a few hours.

Then Resdev Pumadur RT was installed, including coved skirtings to the wall/floor junction.

Due to the nature of the products used Performance Flooring were able to hand back the area within 7 days for the rest of the fitout to commence, finishing ahead of schedule by some, 3 days.
