

CASE STUDIES

- CLIENT ➔ Hackwood Homes
- SECTOR ➔ Car Parks
- SERVICES ➔ Industrial Resin Flooring
- FINISH ➔ Car Park Decking

PROJECT

Performance Flooring were selected by the client to carry out the internal deck coating works and line marking at a development in Poole, Dorset

The project was part of the accommodation complex in the prestigious Sandbanks area.

Sikafloor EB14 was installed to the basement car park deck, bike store, buggy store and plant rooms give a highly decorative, chemical resistant and non-slip finish.

CHALLENGE

Working to a completion deadline of just 2 weeks, all areas were mechanically prepared to give a sound finish to the concrete. Repairs and indentations were filled with a resin-based scratch coat prior to the installation of the system.

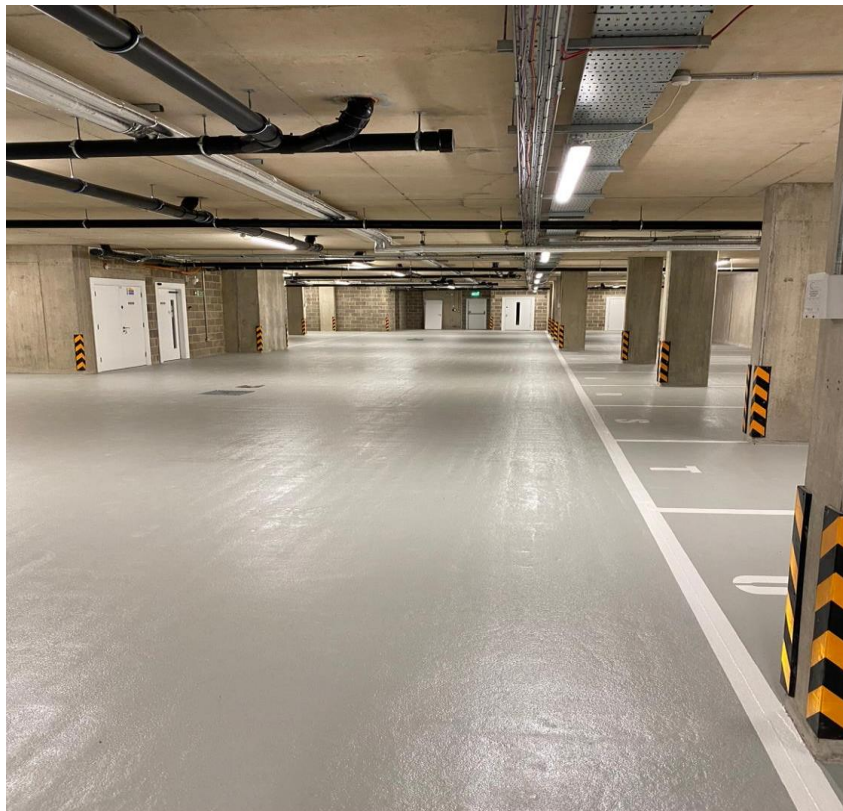

Working once again with Sika to devise the specification and offer a robust proposal Performance Flooring secured the work on the prestigious site.

The works were carried out to a fast track programme meaning working out of hours to meet the demanding deadline.

SOLUTION

A combination of captive shot-blasting and diamond grinding were used to prepare the new concrete slab and also to key the existing store rooms and plant rooms receive the new Sika system.

Sikafloor EB14 system was installed, comprising a base coat of SikaFloor 151 fully blinded with quartz aggregates, a seal coat of SikaFloor 264 in various colours was then installed. SikaCor EG5 was used for all markings. The above system was installed to the basement slab which was fully compatible with the Sika Watertight Concrete system which formed the waterproof concrete.
